RE: Now or Never PAC (the "Committee")**Dear Mr. Morse:**

We are in receipt of your letter dated April 23, 2013 which identified an issue with our 30 Day Post General Report for the period from October 18, 2012 through November 26, 2012. Your letter indicated that the cumulative amount spent by the Committee on the Illinois 8th Congressional District was incorrectly reported as \$1,495,794 rather than \$2,789,614. You asked us to amend our report to address this discrepancy.

We have had this cumulative expenditure issue before with this Committee and with other committees that file with the FEC. This appears to be a software problem. As mentioned when this has arisen before, I have sat down with my assistant (She actually does the initial data entry.) and tried to determine what is causing this. She informs me that when she prepares the 24 Hour/48 Hour Independent Expenditure Report, your software is automatically picking up the cumulative amount expended and she does not actually have the ability to manipulate the cumulative amount. Our 24 Hour/48 Hour Independent Expenditure Reports appear to be correctly picking up the cumulative amounts. When my assistant drafts a regular report, such as the 30 day Post General Report, the data from the Independent Expenditure Reports is automatically pulled into the regular report and she has no ability to manipulate this information. So, while we would again be glad to fix this error, we are unable to determine how our data entry is the problem.

We fully understand the need for the 30 Day Post General Report to reflect the correct cumulative expenditure for each election. We stand ready to make adjustments to the data entered on these reports to correct for these errors. However, we are unclear on how our data
